

Pascale BALTUS, Ir, MBA

Projects Director

Pascale Baltus holds a Master in Electrical and Mechanical engineering (Aerospace engineering) from the University of Liège (1994) , and an executive Master in Business Administration from Vlerick Business School (2017) .

She started her career as an engineer at Alstom, a multinational company operating worldwide as a promoter of sustainable mobility which develops and markets a complete range of equipment and services in the railway sector.

During 20 years, she contributed to the development and delivery of complex train safety systems.

Within Alstom organization, Pascale Baltus held successively the position of Project Manager, Quality Director, and Solution Director. She has developed a strong expertise in international projects management, business processes and change management.

Pascale Baltus joined EORTC in 2018 as Projects Director. She leads and develops the team of Project Managers to ensure timely, operational and financial end-to-end performance of the EORTC projects portfolio, and she oversees the development and implementation of tools and methods for efficient project management within EORTC organisation.
