

Larissa Polders

MSc

Larissa Polders gained her master degree in biomedical sciences (2005) at the University of Leuven.

She started her career at EORTC in 2006 as Clinical Data Manager later as Lead Data Manager and as Clinical Data Expert. In 2016 she was promoted to Head of Data Management Department. She gained her Data Management knowledge in big phase III melanoma trials and while working for various disease oriented groups like EORTC Melanoma group, EORTC Lung Cancer group and the EORTC Imaging group. Always ensuring a high quality level of the scientific data collected, which permits adequate medical monitoring and statistical analysis.

In her current position as Operations Director, she supervises and supports the heads of clinical operations, data management,

monitoring, pharmacovigilance, and regulatory affairs, in leading their respective departments. With as goal to ensure that EORTC deploys, conducts, and concludes clinical research activities appropriately and efficiently.
