

Alexandra Gilbert

University of Leeds, UK

Alex is an Associate Professor and Honorary Consultant in Clinical (Radiation) Oncology. Her research expertise is in the use of patient reported outcomes (PROs) for toxicity measurement both in clinical trials and routine practice.

She has particular interests in PRO methodology in clinical trials and working across European studies to improve the quality of life measurement in cancer patients.

Alex has also been an active member of the EORTC Quality of Life group since 2011. She is a clinical lead on the clinical trial working party of the international SISAQOL Consortium and a member of the PROTEUS international consortium; two international organisations improving the use and analysis of patient reported outcomes in clinical trials and practice.
