

Fábio Borges

EORTC, KU Leuven, Belgium

Fábio Cardoso Borges holds a master's degree in Pharmaceutical Sciences from the Faculty of Pharmacy, University of Lisbon (FFULisboa).

He has experience as a researcher in (pharmaco) epidemiology and outcomes research at the Portuguese Cancer Registry and has also served as a Project Manager at the EORTC.

Alongside, he has worked as a health technology assessment (HTA) assessor for the Portuguese HTA agency (INFARMED IP).

Currently, Fábio is a research fellow at the EORTC and a PhD candidate at KU Leuven, where his research focuses on optimizing the clinical research landscape for anticancer treatments and exploring the value of pragmatic clinical trials in bridging the efficacy-effectiveness gap.
