

## Frederieke van Duijnhoven

The Netherlands Cancer Institute,  
Amsterdam

Dr Frederieke van Duijnhoven, MD PhD LLM, is a surgical oncologist at the Netherlands Cancer Institute in Amsterdam. Her research focusses on de-escalation of local treatment both in primary surgery and following neoadjuvant systemic therapy.

She is project leader of the multicenter DESCARTES trial, in which radiotherapy is omitted in patients with a pathologic complete response to systemic therapy who were treated with breast conserving surgery. In the multicenter LORD trial, of which she is principal investigator, a wait-and-see approach for low risk ductal carcinoma in situ is assessed in 2500 patients.

As Secretary of the EORTC Breast Cancer Group she is involved in several clinical trials and multidisciplinary international research initiatives.
